

AFSEL KHAN M

PROFILE

Detail-oriented pre-final year Computer Science and Engineering student with a strong command of core computing principles and system performance optimization. Combines an **Elite + Silver Medal in Cloud Computing** with robust skills in **Python and SQL** to design efficient algorithms and streamline technical architecture. Driven to solve complex computational problems and deliver high-integrity, scalable engineering execution.

PROJECTS AND PROFESSIONAL ENGAGEMENTS

- IntruderX**
Implemented a real-time telemetry system using IoT sensors. Developed Python-based logic to process environmental triggers and automate response alerts via API.
- Inventrack**
Developed a Python & SQLite database system to track real-time inventory. Engineered analytical queries to monitor stock turnover and provide data-driven procurement insights.
- SkillPointAverage**
Architected a platform to quantify and visualize user performance. Designed the logic to transform qualitative skills into structured, measurable data points for analysis.
- Technical Community Involvement:**
Active contributor to Chennai's tech communities (OWASP, FOSS United), focusing on the strategic intersection of Cloud architecture and data integrity.

AREAS OF INTEREST

- Data Analytics & Consumer Insights
- Artificial Intelligence
- Cloud Computing & Architecture
- Machine Learning

LANGUAGES

- Tamil
- English

CONTACT

-  afselkhanofficial@gmail.com

EDUCATION

Velammal Engineering College, Chennai

B.E. Computer Science and Engineering (Cybersecurity)
2023-2027 | CGPA: 8.46/10

SKILLS

- Programming Languages:
Python, C, C++, Java
- SQL
- Data Structures & Algorithms
- Cloud Computing
- Team Collaboration & Leadership
- Security Foundations
- Problem Solving

CERTIFICATIONS

- NPTEL: Programming, Data Structures and Algorithms Using Python | Elite Medal | Score: 65%
- NPTEL: Cloud Computing | Elite + Silver Medal (Top 5%) | Score: 75%
- Google: Foundations of Cybersecurity
- Google: Google AI Essentials
